OPTIMIZER PLUS[®]

SEE SHIMMERING WATER. NOT ALGAE.

One application. That's all it takes to see and feel what Optimizer Plus[®] can do to your pool water no matter what type of BioGuard Pool Care System you're using.

It suppresses algae to help water look brilliantly clear while making pool water feel spectacularly soft. The benefits last all swim season long – with one easy application. Optimizer Plus also reduces the likelihood of cloudiness.

Optimizer Plus even improves buffering so your water's pH remains consistent, reducing the need for pH adjustment. That means less work and easier pool care.

Not only is it compatible with any of the BioGuard Care Systems, but Optimizer Plus also enhances each of these.

Consult your BioGuard Dealer for expert advice and more information on what Optimizer Plus can do for your pool.
